---

## Section 3

1. Ordered item 1
2. Ordered item 2
3. Ordered item 3

Nulla facilisi. Donec sagittis sapien sed libero dictum, at varius dolor blandit.

---

## Welcome to our website!

This is a long HTML page with lots of content. We've used some techniques to make it more readable and user-friendly.

---

### Section 1: Use Headings

We've used headings to organize the content of this page into sections. This makes it easy for users to quickly scan the page and find the section they are interested in.

---

### Section 2: Use Bullet Points or Numbered Lists

- Bullet point 1
- Bullet point 2
- Bullet point 3

We've used bullet points to break up long paragraphs and make the content more scannable.

---

## Section 3: Use Images and Videos

We've added some images and videos to break up the text and make the page more engaging.

---

## Section 4: Use Tables

Column 1	Column 2	Column 3
Row 1, Column 1	Row 1, Column 2	Row 1, Column 3
Row 2, Column 1	Row 2, Column 2	Row 2, Column 3

We've used a table to organize data into columns and rows. This makes it easy for users to read and understand the data.

---

## Section 5: Use Pagination and Anchor Links

If this page was very long, we could consider using pagination to split the content into multiple pages. We could also use anchor links to allow users to jump to specific sections of the page.

---

[Section 1](#) | [Section 2](#) | [Section 3](#) | [Section 4](#)

## Section 6: Use a Table of Contents

Name	Favorite Color
Bob	Yellow
Michelle	Purple

## The input element
